A seedless grapefruit/pumelo hybrid

914

The 914 is a grapefruit size grapefruit/pumelo hybrid with great internal and external color.

914 was introduced through FAST TRACK and is a UF variety. It has a slightly thicker peel than grapefruit and most 914 fruit have a rosy blush.

It's seedless and generally has higher brix than standard grapefruit and lower acid.

To date, HLB performance has resembled standard grapefruit. Nursery and grower agreements are available.

Highlights

- Grapefruit/pumelo hybrid
