SUGAR BELLE®

A unique mandarin with
great color and flavor

Sugar Belle®

The Sugar Belle® is a unique mandarin hybrid that resembles a Honeybell (Minneola), but trends towards smaller sizes and has better color and flavor.

It has proven to be quite HLB tolerant in all circumstances. Fruiting is improved with sunlight. Avoid shading out.

Fruit typically matures in December, well ahead of Honeybell. Fruit can be low seeded if the trees are isolated. Performs well on all rootstocks except Cleo.

Juice is increasingly popular when blended with orange. Nursery, Packer and Grower agreements are available.

Highlights

- Unique mandarin hybrid
- Matures in December
- Performs well on rootstocks
- Very HLB tolerant
- Great color and popular juice flavor
- Available for licensing through NVDMC
