950

A clementine-sized seedless,
easy-peel mandarin

950

950 is a clementine-sized easy-peel seedless mandarin from UF made available through FAST TRACK for licensing.

It has better average color and flavor than a clementine and matures in December.

This variety may require some horticultural manipulation for fruit-set. Trees perform better than average in the field and are quote vigorous.

It also appears to have some HLB tolerance. Grower and Nursery agreements are available.

Highlights

- The size of a clementine
- Matures in December
- Some HLB tolerance
- Easy peel and seedless mandarin
- Nice color and flavor
- Available for licensing through NVDMC
