# BINGO

A small seedless, easy-peel mandarin

## Bingo

Bingo is a small-sized seedless easy-peel mandarin from the University of Florida/IFAS. It matures from mid-October and holds through November.

Bingo has excellent flavor. Growers have experienced some dieback in Florida, which is under study and evaluation by UF researchers. It was introduced through FAST TRACK and is available for licensing through NVDMC.

The original Bingo trees were almost a decade old before testing positive for HLB. Bingo's long-term performance with HLB is not known, but young trees appear to be doing well in the field.

## Highlights

- Easy-peel mandarin
- Matures in October/November
- Good HLB tolerance
- Seedless
- Excellent flavor
- Available for licensing through NVDMC
